EDUCATION

New York Code and Design Academy, Philadelphia

APRIL 2017 - JULY 2017

A Web Development bootcamp - front end and back end. Here I learned the basics of multiple languages, mainly Javascript and Ruby. Throughout the class I also got a lot of experience working in a team of developers building a project.

EXPERIENCE

TerraFirma, Avon, NJ — *Landscaper*

JULY 2016 - APRIL 2017

After High School I got a job full time as a Landscaper doing everything from removing sidewalks to shovelling rocks all day.

Vic's Pizza, Bradley Beach, NJ — *Bus Boy*

DECEMBER 2015 - JUNE 2016

Back to my roots of a Bus Boy this pizza shop was a pretty messy place, where I had to clean up a lot of pasta and pizza.

Acme, Wall, NJ — *Cashier*

SEPTEMBER 2014 - DECEMBER 2015

Honestly one of the more dull jobs I have held but I did enjoy the experience of having to deal with customers and serving their needs.

10th Ave Burrito, Belmar, NJ — *Bus Boy*

JULY 2012 - AUGUST 2014

My first job at a pretty chaotic mexicali restaurant/bar. Had tons of long nights where I learned a lot of how a restaurant works.

PROJECTS

Carbon Print —

Calculator for environmental footprint.

<https://mattlomet.github.io/enviroprint>

React and Rails based website with a cool modern appearance for an environmental calculator.

PaperBoy —

News aggregator.

https://mattlomet.github.io/paperboy_frontend

React and Rails based website that provides the user a one-stop-shop for all of their news sources.
